

Screen 1: This is how the Page looks originally

The screenshot shows a web application titled "Programs" for "INC Innovated Hub". The interface includes a sidebar with team selection (Designing team, Marketing team, Development team) and a folder list (Products, Sales, Design, Office, Legal). The main content area displays a table of programs with columns: Brand, Description, Members, Categories, Tags, and Next_meeting. The table contains 10 rows of data. Below the table, there are action buttons: "selected", "Archive", "Delete", and "More".

	Brand	Description	Members	Categories	Tags	Next_meeting

<input type="checkbox"/>	Paypal	Placeat beatae dolore...	3 members	Transaction	#digitalTransformation	in 6 hours
<input type="checkbox"/>	Disney	iusto maxime repellendus...	1 member	Web service	#digitalTransformation	No contact

Screen 2: Button Functionality added using JavaScript

This screenshot shows the same web application as Screen 1, but with enhanced button functionality. The "selected" button now has a checkmark icon. The "Archive" button has a folder icon. The "Delete" button has a trash can icon. The "More" button has a dropdown arrow. The table data remains the same as in Screen 1.

	Brand	Description	Members	Categories	Tags	Next_meeting

<input type="checkbox"/>	Disney	iusto maxime repellendus...	1 member	Web service	#digitalTransformation	No contact

Screen 3: Used Hover to pop-up the buttons

This close-up screenshot shows the action buttons at the bottom of the table. The "selected" button is highlighted with a dark background and a white checkmark. The "Archive" button has a folder icon, "Delete" has a trash can icon, and "More" has a dropdown arrow. The buttons are arranged horizontally and are part of a pop-up menu that appears on hover.

Screen 4: Filtering Functionality added using JavaScript array methods
